

License	Short Description
No License	Code is fully copyrighted; others cannot legally use, modify, or distribute it.
Apache License 2.0	Permissive license allowing commercial use, modification, and distribution with attribution and patent protection.
MIT License	Very permissive; allows reuse, modification, and distribution with minimal restrictions (just attribution).
BSD 2-Clause License	Permissive license similar to MIT; allows redistribution with attribution, no endorsement clause.
BSD 3-Clause License	Like BSD 2-Clause but adds a clause preventing use of contributors' names for promotion.
Boost Software License 1.0	Permissive license designed for C++ libraries; allows commercial and open use with attribution.
Creative Commons Zero (CC0) 1.0	Public-domain dedication; users can freely use, modify, and distribute without restrictions.
Eclipse Public License 2.0	Weak copyleft; modifications to EPL-covered code must remain open, but can link with proprietary code.
GNU General Public License v2.0 (GPL-2.0)	Strong copyleft; derivative works must also be licensed under GPL v2.
GNU General Public License v3.0 (GPL-3.0)	Strong copyleft with added protections against tivoization and patent issues.
GNU Lesser General Public License v2.1 (LGPL-2.1)	Weak copyleft; allows linking with proprietary software under certain conditions.
GNU Affero General Public License v3.0 (AGPL-3.0)	Like GPL v3, but requires source disclosure for network/server use.
Mozilla Public License 2.0 (MPL-2.0)	File-level copyleft; modified files must remain open, but larger projects can be proprietary.
The Unlicense	Places code in the public domain; no restrictions on use or distribution.

GitHub	GitLab (Alternative)	Description
GitHub Repositories	GitLab Projects	Git repositories with code, issues, CI, wiki
GitHub Organizations	GitLab Groups	Manage multiple projects and permissions
GitHub Issues	GitLab Issues	Issue tracking with labels & milestones
GitHub Pull Requests	GitLab Merge Requests (MRs)	Code review, discussions, approvals
GitHub Actions	GitLab CI/CD	Built-in CI/CD with <code>.gitlab-ci.yml</code>
GitHub Projects	GitLab Issue Boards	Kanban-style project management
GitHub Wiki	GitLab Wiki	Markdown documentation
GitHub Releases	GitLab Releases	Versioned releases & changelogs
GitHub Packages	GitLab Package Registry	Docker, npm, Maven, PyPI, etc.
GitHub Secrets	GitLab CI/CD Variables	Secure environment variables
GitHub Pages	GitLab Pages	Static website hosting
GitHub Codespaces	GitLab Web IDE / Remote Dev	Browser-based development
GitHub Security Alerts	GitLab Security Dashboard	Dependency & vulnerability scanning
GitHub Dependabot	GitLab Dependency Scanning	Automated dependency checks
GitHub Marketplace	GitLab Integrations	Built-in & third-party integrations
